

## 1. Yantel Cavity Two/Four-way Power Divider/Combiner & Coaxial Step Variable Attenuator Applied to the RFID Reader device Coverage, DAS, POI and Repeater Signal Coverage.

- Application: 1、 Supervision and identify important sites like RFID logistics and supply chain, warehouse, parking lot, etc;  
2、 DAS Distributed Antenna Systems;  
3、 POI Point of Interface;  
4、 Repeater、 Signal Booster Wireless Signal Coverage system, etc.
- Products: Coaxial Step Variable Attenuator、 Cavity Two/Four-way Power Divider/Combiner.

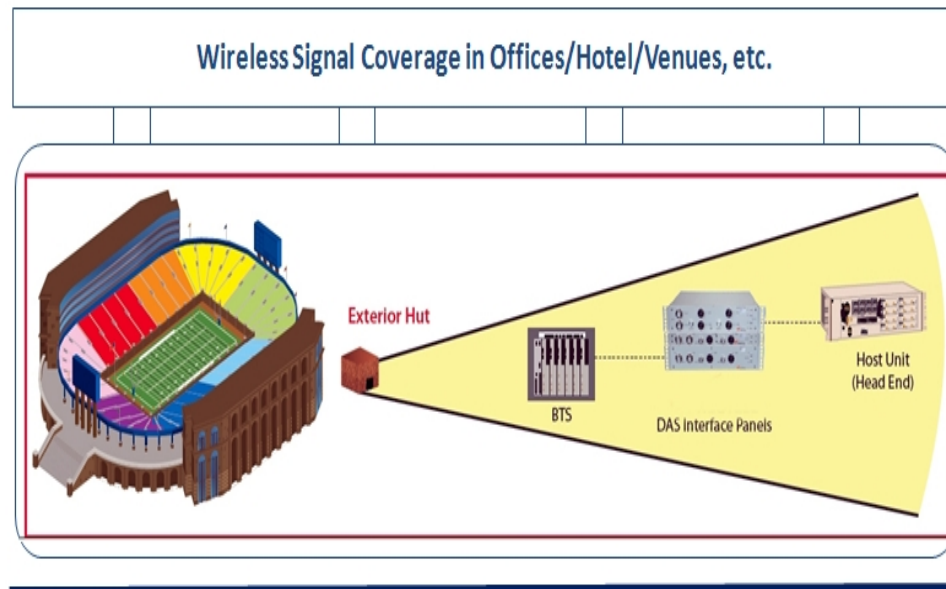

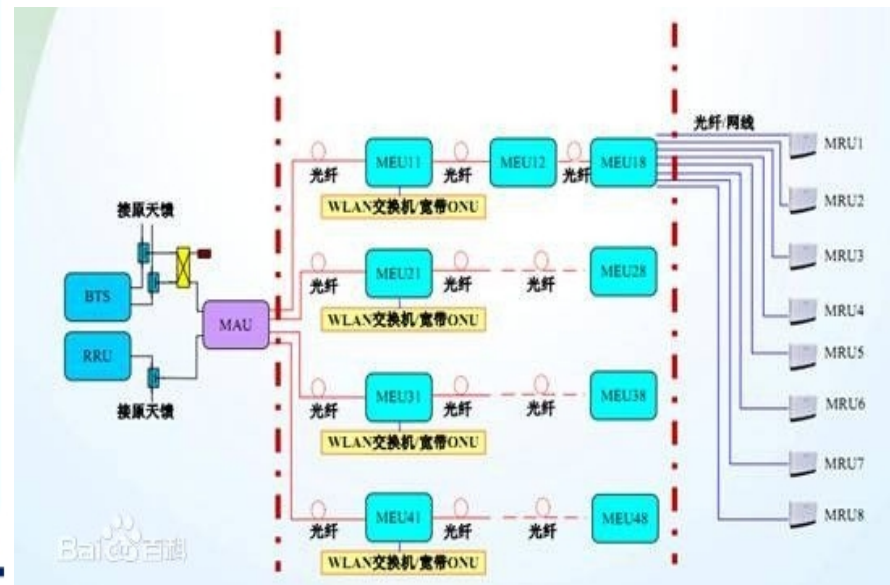

RFID logistics、Warehouse Reader device Power Control-DAS

Repeater、Signal Booster Wireless Signal Coverage system, etc.

POI (Point of Interface system)

DAS (Distributed Antenna Systems)

## 2. Yantel Products' Advantages

### Cost Advantage:

- Yantel coaxial step variable attenuator、cavity Two(Four)-way Power Divider/Combiner price is 40% lower than competitors'.

### Performance Advantages:

- Low VSWR; Low Insertion Loss; High Accuracy; Long Service Life; Low PIM; Great Consistency . ---For Variable Attenuator
- Low VSWR; Low Insertion Loss; High Isolation; Great Consistency. --- For Cavity Power Divider/Combiner
