Typical Performance (-40°C, 25°C, 85°C, 105°C: DC-2 GHz)

Note: It includes the attenuation error from test cables and fixtures(over the temperature).

It includes the reflection error from test cables and fixtures(over the temperature).

Note: This product cannot withstand high temperature over 200°C, therefore lead free or lead reflow soldering is not suitable.

Otherwise, its performance and reliability would be greatly damaged.

Wave soldering should be adopted for this product.
